FREE PRACTICAL WRITING GUIDE

Write Like a Human with AI

A practical method to remove robotic tone, artificial phrasing, excessive formality, generic language, and predictable AI patterns.

Sound clear, natural, specific, and credible - without pretending AI was never used.

VOICE METHOD

A five-part editing framework.

BEFORE & AFTER

Real transformations.

HUMAN REVIEW

Your meaning, judgment, and final voice.

Human-sounding writing begins before the rewrite.

The AI needs your purpose, point of view, examples, and constraints. Editing alone cannot manufacture authenticity.

- Use AI to help express your meaning - not replace it.
- Provide real context, observations, examples, and decisions.
- Ask for natural language, but define what 'natural' means for the audience.
- Remove predictable filler and over-polished phrasing.
- Read the final text aloud and revise anything you would never actually say.

NOT AN AI-DETECTION TRICK

This guide is not about disguising AI use or bypassing disclosure requirements. It is about producing clearer, more natural writing that still reflects the human author's intent, judgment, and responsibility.

The goal is not perfect conversational imitation. The goal is credible professional communication that sounds like a person with something real to say.

Seven signals make writing feel machine-produced.

Most problems come from generic instructions, missing context, and accepting the first draft.

SIGNAL	COMMON AI PATTERN	BETTER DIRECTION
Generic opening	In today's fast-paced world...	Begin with the actual situation or point.
Inflated adjectives	crucial, transformative, robust, seamless	Use one precise fact or consequence.
Excessive transitions	Furthermore, moreover, additionally	Use natural flow or a direct new sentence.
Balanced but empty phrasing	There are benefits and challenges...	State the real trade-off.
Repetitive structure	Every paragraph has the same rhythm	Vary sentence length and paragraph purpose.
Over-formality	I hope this message finds you well...	Use the level of courtesy the relationship requires.
Generic conclusion	In conclusion, success requires...	End with the decision, next action, or actual takeaway.

Five editing moves make AI-assisted writing more human.

Use the full method for important writing or select the part that addresses the current problem.

BLOCK	WHAT IT CONTROLS
V - Voice source	Give the AI examples of how you naturally speak or write.
O - Objective and audience	Define what the reader should understand, feel, decide, or do.
I - Individual detail	Add specific facts, observations, choices, and real constraints.
C - Conversational clarity	Use direct language, natural contractions where appropriate, and fewer formal fillers.
E - Edit for rhythm	Vary sentence length, remove repetition, and read the final text aloud.
ONE-LINE SUMMARY Your voice + a clear purpose + real details + natural language + human editing.	

Give the AI evidence of your voice.

A label such as 'friendly and professional' is too vague to create consistent writing.

- Provide two or three short examples you wrote yourself.
- Identify phrases you use naturally and phrases you avoid.
- Describe your typical sentence length and level of directness.
- Clarify whether you use contractions, humor, technical terms, or informal openings.
- Tell the AI what must remain unchanged: meaning, facts, boundaries, and authority.

VOICE-SOURCE PROMPT

Analyze the writing samples below.

Identify:

- sentence length and rhythm
- level of formality
- directness
- common vocabulary
- use of contractions
- how the writer opens and closes
- phrases or patterns to preserve
- phrases or patterns to avoid

Create a short voice profile.

Then rewrite [TEXT] using that profile without copying sentences from the samples.

VOICE SAMPLES:

[PASTE 2-3 SHORT EXAMPLES]

Natural writing knows who it is talking to.

The same idea should sound different in an executive update, a client email, a LinkedIn post, or an internal note.

QUESTION	DEFINE THIS BEFORE DRAFTING
Reader	Who will read this? What do they already know?
Purpose	What should they understand, decide, feel, or do?
Relationship	Formal, familiar, collaborative, sensitive, or high-stakes?
Context	What happened before this message?
Action	What should happen after the reader finishes?

AUDIENCE INSTRUCTION
Write for [AUDIENCE]. They already know [BACKGROUND], care most about [PRIORITY], and need to [DECIDE / ACT / UNDERSTAND]. Use a [DIRECT / WARM / EXECUTIVE / CONVERSATIONAL] tone.

Specific detail is the strongest antidote to generic writing.

Human writing contains choices, limits, observations, examples, and consequences.

WEAK VERSION	SPECIFIC VERSION
We improved the process.	We removed two approval steps and cut the weekly review from 90 to 45 minutes.
The client had concerns.	The client asked for a clearer handoff plan and one owner for final approval.
AI can increase efficiency.	AI reduced the time needed to organize meeting notes, but a manager still verified every owner and deadline.
The project faced challenges.	A two-day vendor delay moved the testing window and required a revised handoff date.

DETAIL INSTRUCTION

Replace generic claims with the specific fact, example, consequence, choice, or constraint provided. Do not invent details. Mark missing evidence as 'Needs a real example.'

Natural does not mean casual.

It means the language matches how a thoughtful person would communicate in that situation.

FORMAL OR GENERIC	NATURAL ALTERNATIVE
Utilize	Use
In order to	To
At this point in time	Now
It is important to note that	State the point directly
I am writing to inform you that	Begin with the information
Please do not hesitate to contact me	Contact me with questions
Moving forward	Next / From now on / Name the actual next step
Leverage	Use / Apply / Build on
A wide range of	Several / Name the items

Keep formal language when the context genuinely requires it. The goal is not to make every message casual.

Good writing has movement.

AI drafts often repeat the same sentence length, paragraph structure, and transition pattern.

- Mix short and medium-length sentences.
- Use one idea per paragraph.
- Remove repeated explanations and duplicated conclusions.
- Replace transition words with logical sequence when the relationship is already clear.
- Use bullets only when they improve scanning.
- Read the text aloud and revise anything that sounds unnatural or difficult to say.

RHYTHM EDITING PROMPT

Edit the text for natural rhythm.

- vary sentence length
- break long sentences where useful
- remove repeated ideas
- reduce unnecessary transition words
- keep one clear purpose per paragraph
- preserve the writer's meaning and tone
- do not make the writing artificially casual

Return:

1. revised version
2. three brief notes explaining the most important edits

Choose roles that support editing - not roles that invent personality.

The role should focus the work without pretending the AI has lived experience or authority.

ROLE	USEFUL FOCUS
Plain-language editor	Simplify formal, dense, or technical language without losing meaning.
Business communication editor	Improve clarity, tone, structure, and next action.
Voice consistency reviewer	Compare a draft with approved writing samples and flag mismatches.
Executive editor	Lead with decision, risk, or action and remove unnecessary background.
Conversational copy editor	Make writing more natural while preserving professionalism.
Skeptical reader	Identify vague claims, empty language, unsupported certainty, and missing examples.
Audience advocate	Check whether the text answers the reader's actual questions.

AVOID

Do not ask the AI to 'pretend to be a real customer,' 'write from personal experience,' or fabricate emotions, stories, or firsthand authority.

The Human Voice Rewrite Prompt

Use this after you have written the core meaning, facts, and point of view.

COPY & CUSTOMIZE

Act as a voice-consistency and plain-language editor.

Rewrite the text below so it sounds natural, specific, and professional.

AUDIENCE

[AUDIENCE]

PURPOSE

[WHAT THE READER SHOULD UNDERSTAND, DECIDE, FEEL, OR DO]

VOICE

[DIRECT / WARM / EXECUTIVE / CONVERSATIONAL]

Use these writing samples as a voice reference:

[PASTE OPTIONAL SAMPLES]

KEEP

- all confirmed facts
- the writer's actual meaning
- required boundaries and commitments
- important technical terms

IMPROVE

- remove generic openings and conclusions
- reduce excessive formality
- replace vague claims with provided specifics
- vary sentence length
- remove filler, repetition, and forced transitions
- use contractions only where natural for the audience

DO NOT

- invent personal experiences, opinions, emotions, facts, or examples
- add motivational language
- use exaggerated adjectives
- disguise uncertainty

Return:

1. revised version
2. phrases that still sound generic
3. facts or examples the human writer should add

Remove predictable AI language.

Do not ban words mechanically. Replace phrases when they add no real meaning.

PREDICTABLE PHRASE	BETTER MOVE
In today's fast-paced world	Open with the actual situation.
It is crucial to understand	State what matters and why.
This highlights the importance of	Name the consequence.
A game-changer	Describe the measurable change.
Seamlessly	Explain the actual handoff or integration.
Robust solution	Name the capabilities or controls.
Delve into	Review / Examine / Analyze.
Navigate the complexities	Name the specific challenge.
Unlock the potential	State the practical benefit.
At the end of the day	State the conclusion directly.
In conclusion	Use the real takeaway or next action.

Remove ceremony. Keep clarity and respect.

ROBOTIC VERSION

I hope this message finds you well. I am writing to follow up regarding the proposal that was previously shared. We understand that you may have a busy schedule, but we would greatly appreciate the opportunity to discuss any questions or concerns you may have moving forward.

NATURAL VERSION

Hi Jordan,

I'm following up on the proposal I sent Tuesday. Are there any questions I can clarify before you decide on the next step?

I am available Thursday afternoon or Friday morning for a short review call.

- The natural version begins with the real context.
- It removes unnecessary apology and vague business language.
- It gives the reader a clear question and two next-step options.

Replace generic progress language with evidence.

ROBOTIC VERSION

The project has made significant progress across multiple key areas. The team continues to work diligently to ensure all objectives are met in a timely and efficient manner. While some challenges remain, we are confident that the project is moving in a positive direction.

NATURAL VERSION

The team completed the vendor review and approved the revised onboarding checklist. Testing starts Wednesday. The only open risk is the data migration file, which the vendor has not yet delivered. If it arrives by Tuesday afternoon, the planned launch date remains achievable.

- The revision names completed work, the next activity, and the current risk.
- It removes unsupported confidence and motivational filler.
- The reader can understand what changed and what may affect the plan.

A human post contains a real observation.

ROBOTIC VERSION

AI is transforming the way organizations operate in today's rapidly evolving digital landscape. By embracing innovative tools and leveraging cutting-edge technology, businesses can unlock new levels of efficiency and productivity.

NATURAL VERSION

Most teams do not need another AI tool. They need one recurring task with a clear input, a defined output, and a person who reviews the result. That is where the time savings become real - and where the risk becomes manageable.

- The natural version makes a specific claim.
- It reflects a point of view rather than repeating a broad trend.
- It uses concrete workflow elements instead of inflated technology language.

Replace promotional adjectives with operational value.

ROBOTIC VERSION

Our comprehensive and innovative solution provides a seamless, robust, and scalable approach that empowers your organization to optimize workflows and achieve transformative results.

NATURAL VERSION

The engagement maps one recurring workflow, identifies where AI can assist, defines the human review points, and delivers a 30-day action plan your team can test without changing its entire system.

- The natural version explains what the service actually does.
- It removes adjectives the buyer cannot verify.
- It describes scope, controls, and a concrete deliverable.

Most AI drafts improve when you remove 20 to 30 percent.

Cut repetition before adding more personality.

CUT THIS	DO THIS INSTEAD
Repeated point	Keep the strongest version once.
Background the audience already knows	Remove or reduce to one sentence.
Transition phrase	Delete when the paragraph relationship is obvious.
Generic reassurance	Replace with evidence or remove.
Multiple adjectives	Keep one precise descriptor or use a fact.
Conclusion that repeats the introduction	End with the action or consequence.

30 PERCENT EDITING PROMPT

Reduce the draft by approximately 25 percent. Preserve all material facts, decisions, constraints, and requested actions. Remove repetition, filler, generic reassurance, and unnecessary background. Do not make the tone abrupt.

Define your natural professional voice.

Complete this once, then reuse it in future prompts.

VOICE ELEMENT	YOUR NOTES
Audience I write for most often	_____
What I want readers to feel	_____
What I want readers to do	_____
My natural level of directness	Low / Medium / High
My usual sentence length	Short / Mixed / Detailed
Contractions	Often / Sometimes / Rarely
Words or phrases I use	_____
Words or phrases I avoid	_____
How I usually open	_____
How I usually close	_____
Three writing samples to save	_____

Would you actually say this?

The final review should protect meaning, credibility, and responsibility.

☐	The text reflects what I actually think, know, or intend.
☐	Every fact, number, date, example, and quotation is accurate.
☐	The writing contains specific information rather than broad claims.
☐	The tone fits the reader, relationship, and situation.
☐	No personal story, emotion, opinion, or experience was invented.
☐	The language is clear without becoming artificially casual.
☐	Repeated ideas, filler, and predictable AI phrases have been removed.
☐	The text sounds natural when read aloud.
☐	The next action or takeaway is clear.
☐	I am comfortable publishing or sending every sentence in my own name.

The best humanizing step is not another prompt. It is the author's final edit.

Use AI to support your voice - not replace it.

Choose one piece of writing you create repeatedly - an email, update, proposal, report, post, or client message.
Build a reusable voice profile, define the audience and outcome, and keep the final human review.
